Maintenance Worker

Operation of all levels of equipment required for completion of job duties, electrical, plumbing, fabrication of equipment, herbicide applications, and flood fighting. In addition to filling & placing sandbags, placing & securing tarps, driving wooden stakes with a sledgehammer, and tying rope. All district field personnel work on the maintenance and operation of the flood control project facility.

Essential Job Functions

- Operate constructions and power equipment; transport equipment, supplies, and materials to the work site.
- Perform equipment excavation, trenching, and re-filling of the work area for the installation, maintenance, or repair of pipelines and related structures; perform pick-and-shovel work.
- Clear and remove debris, trees, and brush from ditches, canals, and drains; construct temporary and emergency facilities and systems as needed; rebuild gates and respond to emergency leaks.
- Perform routine maintenance duties, including painting, mowing, removal of debris, and trash pick-up and disposal throughout the District.
- Drive dump trucks to haul supplies and materials or pull other wheeled equipment.
- Keep and maintain logs and records of work performed and supplies, materials, and chemicals used.
- Properly follows District and OSHA safety precautions.
- Perform calculations or mixture and application rates; apply herbicides and algacides through a variety of direct and indirect methods; and spray from a truck or other methods.
- Ensure that all chemical storage units comply with State regulations.
- Perform any other duties as assigned, including but not limited to heavy manual labor and shovel

Qualifications, Knowledge of

- District policies, rules, regulations, and procedures.
- Operation and use of light construction equipment
- Basic mathematical calculations

Education and Experience:

- High School graduation or tested equivalent.

License and Certification:

- Must possess and be able to maintain a valid California driver's license and have a satisfactory driving record acceptable and approved by the District's insurance company.
- CA Commercial Drivers License (or complete within the 1 year of employment)

Benefits Included:

- District Health Coverage to include dental and life insurance
- Retirement contributions (457 Ret Plan)
- PTO, Sick Time & Paid Holidays
- Training provided

Working Hours:

- The regular work week consists of a minimum of forty (40) hours, Monday through Friday.
- The work schedule requires this position to respond to emergencies, and during flood season, while in a flood fight, additional overtime hours are required.

About the Lower San Joaquin Levee District:

The Lower San Joaquin River Flood Control Project (Project) is within the LSJLD's boundaries. The Project is a State designed and owned flood facility that encompasses 108 miles of the San Joaquin River, with 192 miles of levees, including multiple flood bypass channels and control structures. The boundary of the LSJLD encompasses over 300,000 acres within parts of three counties (Fresno, Madera, Merced). More information can be found @ <https://lsjld.specialdistrict.org>
